

CLAIMS

1. An enterotoxin adsorbent comprising a compound with
a log P, in which P represents a partition coefficient in an
5 octanol-water system, value of not less than 2.50 as immobilized
on a water-insoluble carrier.

2. The adsorbent according to Claim 1
wherein said water-insoluble carrier is a water-insoluble
10 porous carrier.

3. The adsorbent according to Claim 2
wherein said water-insoluble porous carrier has a
molecular weight of exclusion limit of 5000 to 600000 for
15 globular protein.

4. A method for adsorptive removal of an enterotoxin in
a body fluid
which comprises contacting an enterotoxin-containing
20 body fluid with the adsorbent according to Claim 1.

5. An enterotoxin adsorption apparatus
wherein a housing has an inlet and an outlet for a body
fluid as well as a means for precluding flowing out of an
25 adsorbent therefrom, and is packed therein the adsorbent
according to Claim 1.
